

Business. Innovation. Growth.

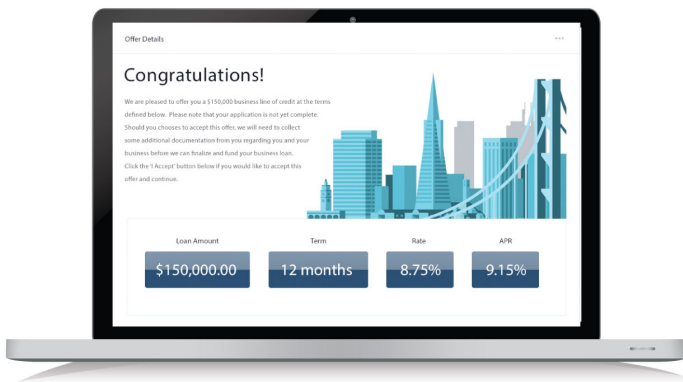

Transform Your Small Business Lending into a Low-Cost, Digitized Operations Platform

Challenge: Lack of profitable funding by banks has left upwards of 60 percent of small business-borrowers to obtain funding from alternative financial resources rather than their current bank.

Solution: Cloud Lending Solutions, a cloud based commercial and small-business loan platform, automates and digitizes the transaction process from origination to funding, lowering origination costs and increasing bank profitability.

Cloud Lending Solutions' comprehensive loan origination platform enables financial institutions to accelerate the small business loan origination process with an automated and efficient experience while effectively managing credit and compliance risk.

Transformative portal technology working with the loan origination platform enables banks to create a modern and intuitive online small business loan application providing transparency between community banks and their small business borrowers.

Reduce The Cost Of Lending

- Configurable customer experience enables community banks to present an efficient, modern user interface to small business and commercial borrowers shortening time to close.

- Resolve issues quickly with on demand access to relationship information anytime, anywhere, and from any device.

Manage Operational Risk

- Portal technology enables creation and publishing of online small business loan applications with online document collaboration providing 100% visibility to both borrowers and lending teams at each stage.
- Gain operational and compliance efficiencies through comprehensive relationship management, underwriting, document management, pricing and approval functionality.

Increase Portfolio Growth And Improve Customer Relationships

- Gain critical sales insights and increase your loan portfolio by integrating with Salesforce CRM.
- Build tailored SME products for your most valued small business customers and differentiate your bank in the market.

Investing in your lending future is critical for your business and growth, with Cloud Lending Solutions you can increase your small business loan production and profitability while increasing operational and compliance efficiencies.
